

## **Breakout Panel Session Themes:**

### **Interprofessional Teamwork**

This session highlights the development and implementation of curricula designed to foster interprofessional collaboration and effective teamwork across healthcare disciplines.

### **Arts and Healthcare Partnerships**

This session explores the essential components of successful collaborations between arts and healthcare organizations. Designed for professionals from both sectors, it offers strategies, real-world examples, and tools to build sustainable partnerships that enhance healthcare education through the arts.

### **Program Evaluation**

This session provides an overview of effective program evaluation methods to assess the impact and outcomes of arts and health initiatives. Presenters will share best practices through case studies.

### **Research Reports**

This session features presentations of current research findings in the field of arts in health. Researchers will share methodologies, outcomes, and insights from recent studies exploring the impact of the arts in healthcare training and education.

### **Medical Signs and Symbols in Art Images**

This session explores how medical themes have been represented within the visual arts throughout history.

### **Arts & Well-being Curriculum**

This session explores the design and implementation of curricula that integrate the arts to promote wellbeing in educational and clinical settings.

### **New & Innovative Programs**

This session showcases cutting-edge programs at the intersection of arts and health. Presenters will highlight creative, forward-thinking initiatives that address emerging needs in healthcare practice through the arts.

### **Visual Thinking Strategies (VTS) Innovations**

In this session discover the ways Visual Thinking Strategies are reshaping both the arts and healthcare sectors. Presenters will share inventive models and offer fresh perspectives on VTS in healthcare training.

### **Inspiring Programmatic Models**

Learn how pioneering arts-based curricula are being seamlessly integrated into healthcare education for all students and trainees. This session will explore examples of longitudinal programs provide students and trainees arts-based experiences throughout their curriculum, to transform their approach to patient care.

### **Hospital Art Programs**

Art programs in hospital environments can contribute to enhancing the experiences of both patients and healthcare providers. In this session presenters will offer evidence-based perspectives and share practical information regarding the implementation of comprehensive art initiatives within healthcare settings.
